The Adchem you see today sits on a 65 acre campus on Long Island, New York's east end. Adchem is a solid employer and an environmentally responsible manufacturer. Its facility is unmatched in the industry. Adchem has changed the game in the adhesive tape industry. Our continued growth clearly demonstrates the success of our innovations.

ADCHEM's adhesive tape solutions have been helping our customers succeed since 1965, with tried and true tape products and strategic, problem-solving ideas from our application engineers.

- **Customize products and original tape designs with our research and development scientists.**
- **Cost-cutting recommendations from our production and manufacturing team.**
- **Product confidence from our quality assurance experts.**

Everything is examined.

From our raw materials to the paper we use, all of the components in the process of making adhesive tape meets the most exacting standards and under-go comprehensive quality testing. Nothing is left unquestioned. Every element of the process effects the outcome.

Versatile technologies, focused on customer needs.

Our adhesive tape products can be found in every sector of daily life.

ADCHEM provides adhesive tape products for fastening, bonding, laminating, mounting, holding, splicing... virtually any adhesive mounting application. Our tape products will meet your most demanding industrial or consumer requirements.

Product Development

Slitting

Certified Test Labs

Custom Coating

Our capabilities include:

- Solvent and emulsion coating
- Hot melt coating
- Adhesive formulating
- Custom coating
- Custom slitting
- Environmental testing
- Superior Systems and Controls
- Engineered packaging

Our lab testing is ISO accredited.

The Adchem Lab and lab personnel are audited by A2LA for compliance to ISO 17025 standards. During a product's development phase we conduct a wide variety of tests for temperature, humidity and UV exposure as specified by various ASTM, PSTC and other applicable industry standards. Our test methods comply with the ISO 17025 mandated lab procedures for accredited laboratories.

ADCHEM's pressure sensitive tapes meet the most demanding industrial and consumer application requirements. We're recognized for unmatched expertise, time-proven experience, working closely with customers, and helping them identify the issues and develop the solutions best suited to meet their needs.

About Adchem Corporation

Adchem Corporation engineers and manufactures pressure-sensitive adhesive tape systems. The company, founded in 1965, operates in its 200,000 SF ISO 9001-2008 certified research and development facilities in Riverhead, NY. Product development and production are supported by its laboratory which is accredited by A2LA to the ISO 17025 standard. Adchem offers double-sided films, tissues, and fabric tapes; foam tapes, transfer tapes, and custom-coated specialty products. Adchem's 100% solids adhesives, solvent and water-based acrylic and rubber adhesives are used in a variety of industries including abrasives, automotive, construction, electronics, graphic arts, medical, packaging, solar, sound and vibration, transportation and general industrial tape applications. Adchem is active in several industry associations including; Pressure Sensitive Tape Council (PSTC), American Architectural Manufacturers Association (AAMA), and Gasket Fabricators Association (GFA). Adchem is certified under the newly established Responsible Tape Manufacturer (RTM) program of the PSTC.

RTM performance and compliance requirements include industry accepted quality control standards, as well as governmental environmental and labor policies.
